OBJECTIVE

Information Systems Engineering graduate with practical experience in developing and maintaining web-based systems and business applications, including LMS and booking platforms. Adept at translating user requirements into functional solutions, with skills in front-end development, database integration, and system support. Passionate about improving system efficiency and user experience. Seeking a Business Analyst / System Analyst / Web Developer role to deliver impactful digital solutions.

WORK EXPERIENCE

- | | |
|---|-------------------------------|
| Web Developer Intern - Olympia Education Malaysia | September 2025 – January 2026 |
| <ul style="list-style-type: none">Developed and maintained a <i>Learning Management System (LMS)</i>, including dashboards, course management, authentication, and UI enhancements.Designed and improved responsive web interfaces using HTML, CSS, and JavaScript to enhance usability and user experience.Contributed to internal systems development, including a standardized departmental system and a facility booking system for external users.Built and maintained conference and event websites (<i>WiED, IHEC, IHEA</i>), including content updates and user registration features.Performed website maintenance, testing, and debugging to ensure system stability across multiple platforms.Supported digital operations and system readiness for major events, including the <i>Grand Finale Golf Tournament</i>, by assisting with online materials and technical coordination. | |
| RoboRangers Academy Part Timer | February 2024 - July 2024 |
| <ul style="list-style-type: none">Assisted in building and programming LEGO-based robots (EV3, SPIKE Prime, WeDo) for educational use.Supported students by troubleshooting issues and explaining robotics concepts. | |
| Robotic Coach Freelance | January 2022 - Present |
| <ul style="list-style-type: none">Taught robotics using LEGO platforms (EV3, SPIKE Prime, WeDo), guiding students in building, programming, and competition prep.Designed lessons and workshops, developing communication and leadership skills while simplifying STEM concepts for learners. | |

EDUCATION

- | | |
|---|-----------------------------|
| Bachelor of Information Systems Engineering
Universiti Teknologi Mara (UiTM), Shah Alam, Selangor | October 2022 - January 2026 |
| <ul style="list-style-type: none">CGPA: 3.24 | |
| Malaysian Matriculation Program
Negeri Sembilan Matriculation College | July 2021 - May 2022 |
| <ul style="list-style-type: none">CGPA: 3.46 MUET: Band 4 | |

PROJECT AND TASKS

- | | |
|--|-----------|
| The Development of Nursing Home Volunteer and Donation Management System (FYP) | July 2025 |
| <ul style="list-style-type: none">Led full system development lifecycle, from requirements gathering to implementationConducted stakeholder interviews and surveys to define system requirementsDeveloped system using HTML, CSS, JavaScript, Node.js, and MongoDBProduced SRS and SDD documentation, ensuring alignment between business needs and system featuresImplemented features such as volunteer scheduling, donation tracking, chatbot support, and automated receiptsImproved operational efficiency through centralized data management | |

Tiga Budak Gemok – Food Ordering System (Group Project)

- Collaborated with team members to gather and analyze business and user requirements for a food ordering system
- Translated requirements into system workflows, user interfaces, and functional features
- Designed and developed system modules including menu management, order processing, and customer interaction
- Supported database design and integration for efficient data handling
- Conducted testing and debugging, ensuring system reliability and usability
- Assisted in preparing basic documentation (features, workflows, and system structure)

Learning Management System (Internship Project)

- Designed and developed LMS modules including dashboards, course management, and authentication
- Implemented role-based access control and real-time notifications
- Improved UI/UX for better navigation and system usability
- Conducted system testing, debugging, and ongoing maintenance, ensuring stable performance and real-time data handling for course management and notifications.
- Collaborated with team members to document requirements, prepare SRS/SDD, and ensure the system aligned with chairman expectations.

Standardized Internal System for Smart, Enroll & Media Departments (Internship Project)

- Assisted in developing a standardized internal system using Python
- Built modules for data entry, reporting, and workflow management
- Helped streamline operations across multiple departments

Conference & Event Websites (WiED, IHEC, IHEA) (Internship Project)

- Developed and maintained event websites using Laravel and Tailwind CSS
- Implemented user registration and content management features
- Ensured system stability during live events through maintenance and updates

IoT Fire Safety Monitoring System (ESP32)

July 2025

- Developed IoT-based monitoring system using sensors for temperature, gas, and flame detection
- Integrated automated safety responses (alarm, fan, water pump)
- Enabled real-time monitoring via Blynk platform and Telegram alerts

CERTIFICATION

• Microsoft Certified: Azure Data Fundamentals

Participated in a comprehensive course organized by Yayasan Peneraju and Asia Pacific University, where I validated my foundational knowledge of core data concepts and Azure data services. Throughout the program, I actively engaged in hands-on learning, applying these skills in real-world scenarios and collaborative projects to deepen my understanding of data-driven solutions.

• Microsoft Certified: Power BI Data Analyst Associate

Participated in an intensive course organized by Yayasan Peneraju in collaboration with Asia Pacific University, where I consistently applied Power BI software over several months. The course provided comprehensive training on data visualization, analytics, and dashboard development, enhancing my skills in data-driven decision-making and business intelligence.

ADDITIONAL INFORMATION

Language:

Bahasa Malaysia (Native), English (Moderate)

Soft Skills:

Communication, Problem Solving, Team Leadership

Hard Skills:

Programming & Development: C++, HTML, CSS, JavaScript, PHP

Database Management: MySQL, MariaDB, MongoDB, RapidMiner

Tools & Platforms: Visual Studio Code, Xampp, ArduinoIDE, LEGO Mindstorms, Github, Vercel,cPanel

Software: Microsoft (Word, Powerpoint), Canva, Figma
